

INDUSTRIAL SAWING SOLUTIONS

Flexible sawing technology - as individual as your product

Customized solutions for every requirement - from **batch size 1** to **serial production**.

Maximum performance:

High capacity and precise cuts, regardless of panel material and package height.

Durable & powerful:

Innovative technology for economical and sustainable production.

Flexible batch size 1 saws

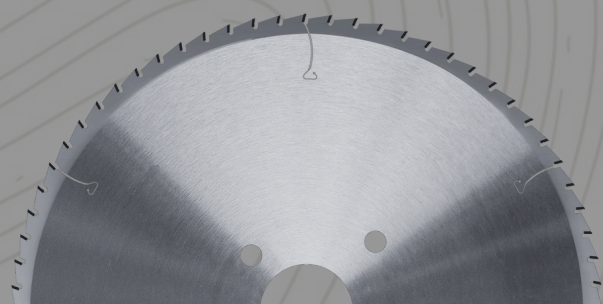

- Gantry saws

Saws for series production

- Middle-cut saws
- Multirip saws
- Pressure beam saws

Special saws

- CNC saws for frame processing
- Diagonal saws

INDUSTRIAL SAWING SOLUTIONS

Flexible sawing technology - as individual as your product

Technologies for maximum efficiency

Customized solutions

From an individual machine to fully automated production lines.

Maximum efficiency

Optimized production processes for maximum cost-effectiveness.

Cross-industry expertise

For the door, furniture, insulation, flooring and board industry, Cement fiber, gypsum fiber, aluminum and plastics processing.

KRAFT is known for pioneering technologies that set new standards for the industry.

Rely on our know-how for your production of tomorrow!

In combination with IDA, the KCS (Kraft Control System) enables user-friendly handling and also the optimization/monitoring of the production line performance.

User-friendly design:

- Clear messaging & graphics for maximum transparency

Simple operation:

- Intuitive interface for quick interventions

Full control:

- Easy access to information & control functions
